PESTS OR PLENTY? Sound, color, 16 mm., 13 minutes.

The story behind the farmer's need for safe, effective pest control techniques to produce the abundance and variety of food that the American fam-

ily enjoys every day of every season. After centuries of standing helpless before the onslaught of pests that destroyed much what was grown, scientific research has developed a wide variety of modern, safe pest control techniques and tools—chemical, biological, cultural, mechanical—with which we are now able to effectively protect our crops and livestock. Thus our twentieth century revolution in agriculture has enabled us to produce food enough for ourselves and hungry millions abroad as well. Cleared for TV.

MOTION PICTURES

For loan or purchase information, write to Motion Picture Service, Office of Information, U.S. Department of Agriculture, Washington, D.C. 20250.

Something to crow about. Sound, color, 16 mm., 27½ minutes.

We accompany a European magazine writer to a hatchery, a feed mill, a broiler farm, a processing plant, and a supermarket. In the market we see an abundant display of attractively-packaged, USDA-inspected and graded poultry, poultry parts, and poultry convenience food products—all available at reasonable prices. The American consumer is reminded that every poultry product bearing the circular USDA inspection mark is safe, clean and wholesome. At a large modern processing plant, the U.S. Department of

Agriculture's poultry inspection program—which enables consumers to select poultry with confidence—is pictured and explained. (Available from film libraries at State Universities.)

Rural holidays. Sound, color, 16 mm., 25 minutes.

Farmers and ranchers offer many kinds of rural recreation to the city dweller, from the day camp to the ski slope. Community watershed lakes and picnic grounds are among the recreation benefits of the Watershed Protection Program. Farmers are encouraged to develop new recreation facilities, thus diversifying and increasing income. (Available from Soil Conservation Service film libraries.)

Handling livestock safely. Sound, color, 16 mm., 9¾ minutes.

Shows hazardous obstacles to avoid in handling and transporting livestock.
